Trans. of ETZ [Elektrotechnische Zeitschrift].
Ausgabe B. [der Elektrotechniker] (Germany) 1962,
v. 14, no. 3, p. 49-55.

DESCRIPTORS: *Carbon brushes, *Commutators.
Electric machinery. Power equipment, Materials.

The author suggests a definition of commutating ability
of carbon brushes and gives a measurement procedure
for it. Ultimately, the commutation difficulties of elec-
trical machines are due to the self induction of the rotor
windings. In switching a rotor segment the brush is not
loaded with the energy stored in this inductance, but
with a voltage impulse. For this reason the measuring
procedure chosen here avoids the possibility of every
